INTRODUCTION

South Carolina Criminal and Juvenile Justice Trends, 2001 is designed to provide basic information about criminal and juvenile justice in South Carolina. This publication also provides simple statistical information about crime rates, arrests, conviction rates, inmates, probationers and parolees. It addresses issues frequently raised about crime and seeks to clarify misconceptions about the state's criminal justice system.

Most trend information in this booklet is based on data for calendar years 1975 - 2000 or the fiscal years ending in 1975 - 2000. Fiscal years are referred to by the abbreviation FY followed by the last two digits of the year in which the fiscal year ended. School years are referred to by the abbreviation SY followed by the last two digits of the year in which the school year ended. Other time frames are specifically noted. The sum of total percent columns may not equal 100 due to rounding. Copies of this report or information regarding this publication can be obtained by writing, calling or sending electronic mail requests to the following:

OFFENSES

CRIME INDEX: The crime index is a basic measure of crime. The offenses defined as index crimes were chosen because of their serious nature, the frequency of their occurrence, and the level of public interest. The offenses of murder, rape, robbery and aggravated assault are defined as violent crimes. Breaking or entering, larceny, and motor vehicle theft are defined as property crimes. The crime index is the total of these offenses reported by law enforcement agencies to the State Law Enforcement Division (SLED).

CRIME RATE: The crime rate shows the number of index crimes per 10,000 units of population. The crime rate is a measure of criminal activity that allows valid comparisons over time and among areas of differing population sizes.

The formula for calculating crime rates follows below:

$$\text{Crime Rate} = \frac{\text{Number of Crimes} \times 10,000}{\text{Total Population}}$$

Formula for calculating percent change:

$$\text{Percent change over previous year} = \frac{X2 - X1}{X1}$$

Where: X1= Number, rate of crimes, arrests in previous year.

Where: X2= Number, rate of crimes, arrests in present year.

South Carolina's crime index rate decreased 3.7% from 1999 to 2000. From 1975 to 2000, the crime index rate increased 21.1%.

CRIME INDEX: The crime index consists of murder, rape, robbery, aggravated assault, breaking or entering, larceny and motor vehicle theft.

ANNUAL SUMMARY

Year	Number of Offenses	Rate Per 10,000 Inhabitants

State and National Violent Crime Rates

South Carolina's murder rate didn't change from 1999 to 2000. The murder rate has decreased 49.7% since 1975.

MURDER: Murder is the willful killing of one person by another. The classification of this offense is based on police investigation as opposed to the determination of a court, medical examiner, coroner, jury or other judicial body. Deaths caused by negligence, suicide, accident or justifiable homicides are not included.

ARRESTS

Arrest counts provide a measure of law enforcement's response to crime and also provide descriptive data concerning offenders. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community over time. The arrest practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies. But the practices for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. Uniform Crime Reporting procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested, since one person may be arrested several times during the year for the same or different offenses (Crime in the United States).

South Carolina's clearance rates for murder, rape, robbery, aggravated assault and breaking or entering were higher than or equal to national clearance rates. The state's clearance rates for larceny and motor vehicle theft were lower than national clearance rates.

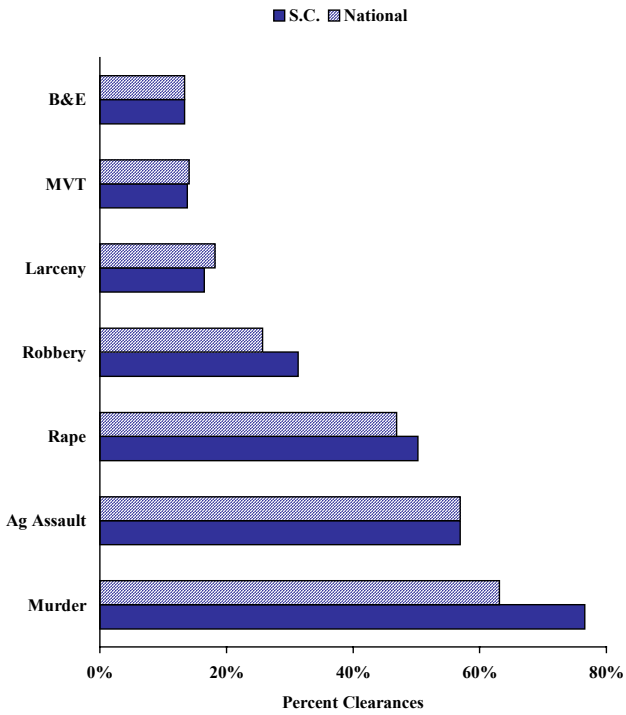

CLEARANCE: A crime is cleared when a law enforcement agency has identified an offender, and there is enough evidence to charge him with a crime. A crime is also cleared when some element beyond law enforcement's control precludes placing charges against an offender. The arrest of one person can clear several crimes. Conversely, several persons may be arrested in clearing one crime.

**STATE AND NATIONAL CLEARANCE RATES
2000**

Year	South Carolina	United States
Murder	76.6%	63.1%
Rape	50.2%	46.9%
Robbery	31.3%	25.7%
Aggravated Assault	56.9%	56.9%
Breaking & Entering	13.4%	13.4%
Larceny	16.5%	18.2%
Motor Vehicle Theft	13.8%	14.1%

JUDICIARY

The judicial system of South Carolina consists of several different levels of courts. These courts include the Supreme Court, the Court of Appeals, the circuit courts (both General Sessions and Common Pleas), the family courts, the magisterial courts, the municipal courts, the probate courts, and the master-in-equity courts. The prosecutorial system consists of the circuit solicitors and the Office of the Attorney General. The defense component includes public defender corporations, court appointed counsel, retained counsel, and the Office of Appellate Defense (S.C. Judicial Department). Court data presented in the following pages represent activity on the part of the circuit, magisterial and municipal courts.

The number of cases filed in South Carolina's Court of General Sessions increased 1% from FY 99 to FY 00.

Type of Trial in South Carolina Municipal Courts

JAILS

The jail system in South Carolina provides an important example of intergovernmental cooperation. Although jails are the administrative and financial responsibility of local governments, both county and municipal, the South Carolina Department of Corrections (SCDC) is responsible for ensuring that local jails and detention centers meet certain operational standards. Jails must meet these standards to be certified for operation. Jails and detention centers are an important segment of the criminal justice system. They detain prisoners before trial, and provide a place where some inmates may serve their sentences. Data concerning jail capacity and use are available for calendar years 1985 through 2000.

The total capacity of South Carolina's jails increased 152.3% from 1985 to 2000, and increased 5% from 1999 to 2000.

South Carolina Juvenile Detention Capacity

CORRECTIONS

The South Carolina Department of Corrections is a cabinet agency, headed by a director reporting directly to, and serving at the pleasure of, the Governor. The director administers policy and is responsible for the operation of a modern, statewide penal system. The department is responsible for the incarceration of offenders in a safe, secure and humane setting in order to protect public safety. The department also provides offenders with opportunities to become productive, law abiding citizens.

South Carolina ranked seventh among the states, incarcerating 532 inmates per 100,000 residents. The national incarceration rate was 478 inmates per 100,000 residents.

**STATE INCARCERATION RATES:
THE TEN HIGHEST, DECEMBER 31, 2000**

State	Incarceration Rate per 100,000
Louisiana	801
Texas	730
Mississippi	688
Oklahoma	685
Georgia	550

South Carolina Inmates by Sentence Length

COMMUNITY CORRECTIONS

The South Carolina Board of Pardons and Paroles consists of seven members, appointed by the Governor and confirmed by the Senate. This board is responsible for granting paroles and pardons. The South Carolina Department of Probation, Parole and Pardon Services (SCDPPPS) is a cabinet agency, with the director reporting to, and serving at the pleasure of, the Governor.

SCDPPPS is responsible for providing adult community supervision throughout the state. This includes the supervision of those offenders sentenced to probation by the court, paroled by the board or placed on early release programs. SCDPPPS also works closely with the Board of Pardons and Paroles to provide information required for its consideration in granting paroles and pardons.

Note: From 1941 through Fiscal Year 82, SCDPPPS was known as the South Carolina Department of Probation, Parole and Pardons. From Fiscal Year 83 through Fiscal Year 85, the agency was known as the South Carolina Department of Parole and Community Corrections. The current name has been in use since FY 86. In the interest of both brevity and thoroughness, source notes referring to materials taken from annual reports for those years will reference only SCDPPPS for the corresponding years. Full reference, with appropriate citation for all years, can be found under Sources.

There were 91.5 offenders under community supervision per 10,000 population in South Carolina in FY 00. Abbeville County had the highest rate with 129.4 offenders under supervision per 10,000 population.

South Carolina Parole Admissions by Age

■ FY 00 ■ FY 85

JUVENILE ARREST RATES

Besides being a gauge of law enforcement's response to crime, arrest rates provide reliable data concerning the age, sex and race of apprehended offenders. Consequently, arrest rates by age provide a good measure of juvenile delinquency. Uniform Crime Reporting procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. As a result, annual arrest figures do not measure the number of individual juveniles arrested, since one juvenile might be arrested several times during a year (Crime in the United States, FBI). In keeping with state law which sets the age of adult responsibility in most criminal matters at seventeen years of age, arrest rates were calculated on the basis of the estimated juvenile (age 0 through 16) population for each year in question.

South Carolina's 2000 crime index arrest rate for juveniles represents a 10.9% decrease from 1999, but a 14.2% increase over 1976.

CRIME INDEX: The crime index consists of murder, rape, robbery, aggravated assault, breaking or entering, larceny and motor vehicle theft.

JUVENILE CRIME INDEX ARREST RATE

ANNUAL SUMMARY

Year	Number of Arrests	Rate Per 10,000 Juveniles
1999	6,440	70.99
2000	6,027	63.25
% Change	-6.4%	-10.9%

MULTI-YEAR TREND

Year	Number of Arrests	Rate Per 10,000 Juveniles

CRIME IN SCHOOLS

Concern over the safety of children in school led to the Safe Schools Act of 1990, which requires the collection and reporting of school crime incidents. School crime incidents include offenses committed on public school campuses, during travel to and from schools on public school buses, and during school functions. In the case of incidents involving more than one crime, the incident is categorized according to the most serious of the offenses. The South Carolina Department of Education collects information concerning school crime incidents and reports the results annually. The data presented in this section represent incidents from June 2000 through May 2001 (SY 01).

The leading offense category of school crimes in South Carolina public schools during SY 01 was crimes against the person. Disrupting school crimes ranked second, followed by crimes against property.

SCHOOL CRIMES BY OFFENSE CATEGORY

Offense	Number	Percentage
Against Person	5,592	44.8%
Disruption	4,947	39.6%
Property	1,943	15.6%

Weapon Involvement in South Carolina School Crimes, SY 01

RESPONSES TO JUVENILE CRIME

The South Carolina Department of Juvenile Justice (DJJ) serves as the state's designated juvenile justice agency. The Family Court is the arm of the state's judicial system that disposes of most juvenile cases. DJJ supports the Family Court system by providing intake services, diversion programs, and probation and aftercare supervision. DJJ operates the Reception and Evaluation (R&E) Center as well as all the state's long term correctional facilities. The R&E Center temporarily holds juveniles committed by the Family Court between the adjudicatory and dispositional hearings for comprehensive diagnostic testing and treatment recommendations. DJJ also operates or contracts a number of programs designed to serve as non-institutional alternatives which include marine institutes, family preservation services, and group homes.

Property offenses accounted for 19.6% of all referrals to DJJ. Among other criminal offenses, contempt of court and simple assault and battery were the most commonly occurring offenses.

Admissions to DJJ Institutions

CRIMINAL JUSTICE FISCAL DATA

This section examines three levels of government involved in direct expenditures related to the administration of justice in South Carolina: state, county and municipal. Additionally, federal criminal justice agencies operate in South Carolina, and provide federal funding to state and local units of government for fighting crime and administering justice. It is important to note that a variety of agencies have as part of their mission, criminal justice related functions, and that parts of the mission of some criminal justice agencies might be considered to be outside the realm of criminal justice. This publication does not attempt to capture and define all fiscal data related to every criminal justice function, but does attempt to provide a broad overview of criminal justice spending by presenting financial data relating to those agencies that are primarily involved in administering justice and enforcing the law.

The Department of Corrections had the largest appropriation among the state's criminal justice agencies for FY 02.

**STATE CRIMINAL JUSTICE APPROPRIATIONS
FY 02**

Agency	Appropriations
Corrections	362
Public Safety	178
Juvenile Justice	98
SLED	49
Probation, Parole & Pardon Services	44
Judicial Department	40
Natural Resources	17

Notes: Appropriations represent millions of dollars, rounded to the nearest million. Department of Natural Resources only includes appropriations for law enforcement. It is also important to note that appropriations do not take into account budget cuts that occur during the fiscal year.

Source: 2001 Appropriations Act.

State Criminal Justice Agency Appropriations, FY 02

Appropriations for state criminal justice agencies decreased 7.5% from FY 01 to FY 02.

STATE CRIMINAL JUSTICE APPROPRIATIONS

Fiscal Year	Appropriation	Change From Prior Year
1994	\$485,606,282	
1995	\$530,433,777	+9.2%
1996	\$567,018,397	+6.9%
1997	\$665,272,951	+17.3%
1998	\$707,261,493	+6.3%
1999	\$753,113,257	+6.5%
2000	\$766,033,859	+1.7%
2001	\$851,871,658	+11.2%
2002	\$787,697,965	-7.5%

Notes: This includes appropriations for the Department of Corrections, the Department of Public Safety, the Department of Juvenile Justice, the Department of Probation, Parole & Pardon Services, SLED, the Judicial Department and the law enforcement appropriations for the Department of Natural Resources. It is important to note that appropriations do not take into account budget cuts that occurred during the fiscal year.

Sources: Appropriations Acts, 1993 through 2001.

State Criminal Justice Appropriations

The Department of Corrections had the largest authorized work force among criminal justice agencies for FY 02, with 7,498 positions.

**STATE CRIMINAL JUSTICE EMPLOYMENT
FY 02**

Agency	Positions
Corrections	7,498
Public Safety	3,064
Juvenile Justice	1,712
Probation, Parole & Pardon Services	990
SLED	614
Judicial Department	556
Natural Resources	303

Note: Full time equivalent positions are rounded to the nearest whole number. Department of Natural Resources full time equivalent positions include only law enforcement positions.

Source: 2001 Appropriations Act.

Authorized Positions for State Criminal Justice Agencies, FY 02

From FY 94 to FY 02, the authorized number of positions for state criminal justice agencies has increased 31%. From FY 01 to FY 02 the number of positions decreased .1%.

STATE CRIMINAL JUSTICE EMPLOYMENT

Fiscal Year	Positions	Change From Prior Year
1994	11,253	
1995	11,832	+5.1%
1996	12,343	+3.5%
1997	13,739	+11.3%
1998	14,137	+2.9%
1999	14,391	+1.8%
2000	14,578	+1.3%
2001	14,750	+1.2%
2002	14,737	-0.1%

Note: This includes authorized positions for the Department of Corrections, the Department of Public Safety, the Department of Juvenile Justice, the Department of Probation, Parole & Pardon Services, SLED, the Judicial Department, and law enforcement positions within the Department of Natural Resources.

Sources: Appropriations Acts, 1993 through 2001.

Authorized Positions for State Criminal Justice Agencies

Both county and municipal governments spent more on law enforcement than any other criminal justice function.

**LOCAL CRIMINAL JUSTICE EXPENDITURES
IN SOUTH CAROLINA: FY 99**

Function	County	Municipal
Corrections	110.5	2.3
Judicial & Legal	106.2	17.1
Law Enforcement	187.1	217.3
Other Public Safety	24.0	8.2
